ABOUT ME

Software Developer with hands-on, professional experience building SaaS platforms, e-commerce systems, and REST API-driven web applications. Comfortable working across the stack — from Laravel and Django/Python backends to React and Next.js front ends — with a growing focus on Machine Learning and AI. Enjoy taking a product from database design through to a polished, production-ready interface, and I'm equally comfortable picking up new frameworks and tools as a project demands. A collaborative team player who enjoys solving practical problems and shipping real, working software for businesses.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Laravel, PHP, Filament, C, MERN Stack, REST APIs, SQL

Machine Learning / AI: ML, AI

Frontend: React.js, Next.js, JavaScript, HTML, CSS

Tools: VS Code, Git, Docker

Interpersonal Skills: Team player, strong problem-solving abilities, and effective collaboration with cross-functional teams

WORK EXPERIENCE

Software Developer

Leelija Web Solution Pvt. Ltd. | June 2, 2025 – Present

- Developed and maintained multiple Laravel-based web applications and SaaS products, including billing, e-commerce, and SEO platforms.
- Designed and built REST APIs to connect Laravel backends with React and Next.js front ends.
- Worked across the full stack — database design (SQL), backend logic, and responsive UI development.
- Delivered and maintained multiple live, production client projects (see Key Projects below).

KEY PROJECTS

1. GST Billing & Inventory Management System (SaaS)

Tech Stack: Laravel, REST APIs, SQL, JavaScript, CSS, Next.js (frontend), React (admin panel) | thefastbill.com

- Built a multi-tenant SaaS platform for GST-compliant billing, invoicing, and real-time inventory management for retail and wholesale businesses.
- Designed and developed REST APIs in Laravel to power a Next.js customer-facing frontend and a separate React-based admin dashboard.
- Implemented core modules for invoice generation, stock/inventory tracking, and business reporting.

2. E-commerce & Business Platform

Tech Stack: Laravel, SQL, REST API, JavaScript, CSS, HTML | amarmaa.com

- Developed a full-featured e-commerce and business management platform using Laravel with REST API-driven architecture.
- Built product catalog, order management, and business workflow features with a responsive front end.

3. Furniture & Sofa E-commerce Platform

Tech Stack: Laravel, SQL, JavaScript, CSS, HTML | metalixfurniture.in

- Built an e-commerce platform for a furniture and sofa retail brand, covering product listings, categories, and checkout flow.
- Implemented backend logic and database design in Laravel/SQL to support catalog and order management.

4. Web Platform for SEO Linking

Tech Stack: Laravel, SQL, JavaScript, CSS, HTML | gpsites.io

- Developed a Laravel-based web platform to manage and distribute SEO backlinks across multiple sites.
- Designed database schema and admin tools for link/site management and reporting.

5. SEO & Link Building Platform

Tech Stack: PHP, SQL, Node.js, HTML, JavaScript | fastlinky.com

- Built an SEO and link-building platform combining PHP for core application logic with Node.js services.
- Implemented link management, tracking, and reporting features backed by SQL.

6. Cloth Shopping Site

Tech Stack: Laravel, REST API, HTML, CSS, JavaScript | aimanroyale.com

- Developed a clothing e-commerce website with Laravel and REST APIs for product browsing, cart, and checkout.
- Built responsive UI with HTML, CSS, and JavaScript for a smooth shopping experience.
